## PROGRESS AND COMPLETION OF WORK

### NOTICE TO PROCEED

Following the execution of the Contract by the Owner, written Notice to Proceed with the work will be given to the Contractor. The Contractor shall begin and shall prosecute the work regularly and uninterruptedly thereafter (unless otherwise directed in writing by the Owner) with such force as to secure the completion of the work in a responsible and timely manner.

### PRE-CONSTRUCTION CONFERENCE

Prior to issuance of the Notice to Proceed, a pre-construction conference will be held with representatives of the Contractor, Sub-Contractors and Engineer in attendance. Discussion will center on each party's responsibility towards the other, the Contractor's plans for prosecution of the work and subcontracting.

### CONTRACT TIME

The work that the Contractor is required to perform under this Contract shall be commenced at the time stipulated by the Owner in the Notice to Proceed to the Contractor and be fully completed within **THIRTY (30) consecutive calendar days** thereafter as stated in the Agreement. Every calendar day, except as provided herein, shall be counted as a working day.

### SCHEDULE OF COMPLETION

The Contractor shall submit, at such times as may reasonable be requested by the Engineer, schedules which shall show the order in which the Contractor proposes to carry on the work, with dates at which the Contractor will start the several parts of work, the anticipated monthly payments to become due the Contractor, and estimated dates of completion of the several parts.

### LIQUIDATED DAMAGES

Contractor acknowledges that the time for completion is an essential element and consideration for this contract. The liquidated damages charge, as set forth below, is not a penalty but is intended to compensate the Owner for expense, public inconvenience, and increased time in administering the contract, particularly for engineering and inspection required beyond the time specified in the contract, with time extensions, if any, taken into consideration.

It shall be the responsibility of the Owner to render decisions in connection with the liquidated damages, and such decisions rendered shall be final. Time extension requests must be submitted each month with the monthly estimate documented; otherwise, it will be expected that no request is needed and no time extensions will be allowed for that period.

At the expiration of the time allowed for completion, including any time extensions granted in writing, the liquidated damages charges shall be in the amount of **FIVE HUNDRED Dollars (\$500.00)** per each consecutive calendar day. The liquidated damages charges shall be deducted by the Owner from the Contractor's contract payments.

### EXTRA WORK

New and unforeseen items of work found to be necessary and which cannot be covered by any item or combination of items for which there is a Contract price shall be classed as extra work. The Contractor shall do such extra work and furnish such materials as may be required for the proper completion or construction of the whole work contemplated upon written order from the Owner as approved by the Engineer.

In the absence of such written order, no claim for extra work will be considered. Extra work will be performed in accordance with these Specifications where applicable and work not covered by the Specifications or Special Provisions shall be done in accordance with the best practice as approved by the Engineer. Extra work required in an emergency to protect life and property shall be performed by the Contractor as required.

#### EXTENSION OF CONTRACT TIME

A delay beyond the Contractor's control occasioned by an Act of God, or act or omission on the part of the Owner as noted as Excusable Delays, may entitle the Contractor to an extension of time in which to complete the work as determined by the Engineer, provided, however, that the Contractor shall within ten (10) days of such occurrence, give written notice to the Engineer or cause of such delay and of his intention to request an extension of Contract time. If, on the basis of the facts and the terms of this contract, the delay is properly excusable, the Owner shall extend the time for completing the work to a period of time commensurate with the period of excusable delay.

#### EXCUSABLE DELAYS

The Contractor may request an extension of Contract time based on the following Excusable Delays, and the Contractor shall not be terminated nor shall the Contractor be charged with liquidated damages for any delays in the completion of the work due to:

It shall be the responsibility of the Contractor to maintain an accurate set of As-Built Drawings as work progresses. This set of "As-Built Plans" shall be kept on the job site at all times. The "As-Built Plans" shall accurately depict the location of the new facilities installed and any deviations made from the Drawings. Submission of the "As-Built Plans" will be required prior to issuance of final payment. In addition, verification by the Engineer that record drawings are periodically maintained will be required prior to each partial payment by the Owner.

## **MATERIALS AND WORKMANSHIP**

### MATERIALS FURNISHED BY THE CONTRACTOR

All materials used in the work shall be new, meet the requirements of the respective specifications, and no material shall be used until it has been approved by the Engineer. All materials not otherwise specifically indicated within the contract drawings and specifications that are necessary to complete the work shall be furnished by the Contractor at no extra cost to the Owner.

### SHOP DRAWINGS

The Contractor shall provide shop drawings as may be necessary for the prosecution of the work as required by the contract documents. The Engineer shall promptly review all shop drawings. The Engineer's approval of any shop drawing shall not release the Contractor from any responsibility for deviations from the contract documents. The approval of any shop drawing that substantially deviates from the requirement of the contract documents shall be evidenced by a change order.

When submitted for the Engineer's review, shop drawings shall bear the Contractor's certification that he has reviewed, checked and approved the shop drawings and that they are in conformance with the requirements of the contract documents.

Portions of the work requiring a shop drawing or sample submission shall not begin until the shop drawing or submission has been approved by the Engineer. A copy of each approved shop drawing and each approved sample shall be kept in good order by the Contractor at the site and shall be available to the Engineer.

### STORAGE OF MATERIALS

Materials shall be stored as to insure the preservation of their quality and fitness for the work in accordance with manufacturer storage recommendations. When considered necessary, they shall be placed on wooden platforms or other hard, clean surfaces, and not on the ground, and they shall be placed under cover. Stored materials shall be located so as to facilitate prompt inspection. Private property shall not be used for storage purposed without the written permission of the Owner or lessee.

### CHARACTER OF WORKMEN

All workmen must have sufficient knowledge, skill, and experience to perform properly the work assigned to them. Any foreman or workman employed by the Contractor or subcontractor who, in the opinion of the Engineer, does not perform his work in a skillful manner, or appears to be incompetent or to act in a disorderly or intemperate manner shall, at the written request of the Engineer, be discharged immediately and shall not be employed again in any portion of the work without the approval of the Engineer.

### PREFERENCE TO LOCAL MATERIALS AND LABOR

The Contractor shall give preference to the purchase of local materials and to the employment of local labor for all operations. It is understood that such preference will be carried out only to the extent that it will not impair the Contractor's performance, and likewise is not to be construed as prohibiting the Contractor from using his regular organization.

### REJECTED WORK AND MATERIALS

All materials that do not conform to the requirements of the Contract Documents, are not equal to samples approved by the Engineer, or are in any way unsatisfactory or unsuited to the purpose, for which they are intended, will be rejected. Any defective work, whether the result of poor workmanship, use of defective materials, damage through carelessness or any other cause shall be removed, within ten (10) days after written notice is given by the Engineer, and the work shall be re-executed by the Contractor. The fact that the Engineer may have previously overlooked such defective work shall not constitute an acceptance of any part of it.

#### FAILURE TO REMOVE DEFECTIVE WORK

Failure of the Contractor to remove defective work and re-execute the work within ten (10) days after written notice shall result in default by the Contractor.

#### CORRECTION OF FAULTY WORK AFTER PAYMENT

Correction of faulty work after final payment shall be in accordance with Section 01009 of these specifications.

#### MANUFACTURER'S DIRECTIONS

Manufactured articles, material and equipment shall be applied, installed, connected, erected, used, cleaned and conditioned as directed by the manufacturer unless herein specified to the contrary.

#### SUBSTITUTIONS

"Approved equal", "equal", and "equal with prior approval" phrases shall be defined as material and/or equipment of similar construction and equal quality only as approved by the Engineer. No substitutions or equivalents will be considered during the Contract Time, except for minor substitutions due to the unavailability of specified items.

Whenever a material, article or piece of equipment is identified on the drawings or specifications by reference to brand name or catalog number, it shall be understood that this is references for the purpose of defining the performance or other salient requirements and that other products of equal capacities, quality and function shall be considered. The Contractor may recommend the substitution of a material, article, or piece of equipment of equal substance and function for those referred to in the contract documents by reference to brand name or catalog number, and if, in the opinion of the Engineer, such material, article, or piece of equipment is of equal substance and function to that specified, the Engineer may approve it's substitution and use by the Contractor. Any cost differential shall be deductible from the contract price and the contract documents shall be appropriately modified by change order. The Contractor warrants that if substitutes are approved, no major changes in the function or general design of the project will result. Incidental changes or extra component parts required to accommodate the substitute will be made by the Contractor without a change on the contract price or contract time.

#### PATENTS

The Contractor shall pay all applicable royalties and license fees. He shall defend all suits or claims for infringement of any patent rights and save the Owner harmless from loss on account thereof, except that the Owner shall be responsible for any such loss when a particular process, design, or the product of a particular manufacturer or manufacturers is specified, but if the Contractor has reason to believe that the design, process or product specified is an infringement of a patent, he shall be responsible for such loss unless he promptly gives such information to the Engineer.

#### CLEANING UP

The Contractor shall, at all times, keep the construction area, including storage areas used by him, free from accumulations of waste material or rubbish and, prior to completion of the work, remove any rubbish from and about the premises, and remove all tools, equipment, and materials, not the property of the Owner. Upon completion, and prior to final payment, the Contractor shall leave the premises in a neat, clean, and workmanlike condition satisfactory to the Engineer. All property, both public and private, which has been damaged in the prosecution of the work, shall be restored in an acceptable manner approved by the Engineer prior to final payment to the Contractor.

## MEASUREMENT AND PAYMENT

### REQUESTS FOR PAYMENT

The Contractor may submit each month, and no more than once a month, a Request for Payment for work completed and materials delivered and stored on the site. The Contractor shall furnish the Engineer all reasonable support documentation and weigh tickets to substantiate the progress and execution of the work. Payment for materials stored on the site will be conditioned upon evidence submitted by the Contractor to establish the Owner's title to such materials.

Each Request for Payment shall be computed from the work completed on all items listed in the detailed breakdown of the Contract amount, less ten percent (10%) to be retained until final completion and acceptance of the work less liquidated damages, if any, and less previous payments. Where unit prices are specified, the Request for Payment shall be based on the quantities completed. Any oversight of work not included in the submitted Request for Payment can be included with the following monthly Request for Payment.

- b. Evidence indicating the probable filing of claims by other parties against the Contractor.
- c. Failure of the Contractor to make payments to subcontractors, material supplier or labor.
- d. Damage to another contractor.

### PAYMENTS FOR EXTRA WORK

Written notice of claims for payments for extra work shall be given by the Contractor within ten (10) days after receipt of instructions from the Owner, as approved by the Engineer, to proceed with the extra work, and also before any work is commenced, except in emergency endangering life or property. No claim shall be valid unless so made. In all cases, the Contractor's itemized estimate sheets showing all labor and materials shall be submitted to the Engineer. The Owner's order for extra work shall specify any extension of the Contract time and one of the following methods of payment:

- a. Unit Prices

  1. Labor, including foremen.
  2. Materials entering permanently into the work.
  3. The ownership or rental cost of construction plant and equipment during the time of use on the extra work.
  4. Power and consumable supplies for the operation of power equipment.
  5. Insurance.
  6. Social Security and unemployment contributions.

d. Negotiated Agreement

These shall be obtained upon forms approved by the Owner.

ACCEPTANCE AND FINAL PAYMENT

When the Contractor has completed the work in accordance with the terms of the Contract Documents, the Engineer will certify his acceptance to the Owner and his approval of the Contractor's amount, plus all approved additions less all approved deductions, including liquidated damages, and less previous payments made. If required by the Owner, the Contractor shall furnish evidence that he has fully paid all debts for labor, materials and equipment incurred in connection with the work, following which the Owner will accept the work and release the Contractor, except as to the conditions of the required bonds, any legal rights of the Owner, required guarantees, and correction of faulty work after final payment, and shall authorize payment of the Contractor's final Request for Payment. The Contractor must allow sufficient time between the time of completion of the work and approval of the final Request for Payment for the Engineer to assemble and check the necessary data.

TERMINATION OF CONTRACTOR'S RESPONSIBILITY

The Contract will be considered complete when all work has been finished, the final inspection made by the Engineer, and the Project accepted in writing by the Owner. The Contractor's responsibility shall then cease, except as required by the guaranty period and as set forth in the bonding requirements.

CORRECTION OF FAULTY WORK AFTER FINAL PAYMENT

The approval of the final Request for Payment by the Engineer and the making of the final payment by the Owner to the Contractor shall not relieve the Contractor of responsibility for faulty materials or workmanship.
